Specialized Outpatient Therapy Services
Individual, group, and family therapy are available to children and adults with both intellectual/developmental disabilities (ID/DD), including Autism Spectrum Disorder. Services are provided at locations in Olathe and Paola with some limited options available for in-home therapy.

Admission Criteria
We serve preschool-aged children through adulthood. Many individuals engaged in services have difficulties with emotional regulation, social interactions, impulse control, obsessive thoughts/behaviors, anger management, anxiety, depression, trauma, relationship issues, or grief/loss.

Admission is not based on previous or current services received at Lakemary.

Admission Process
Referrals to Lakemary can come from a variety of sources including families, targeted case managers, school districts, and mental health professionals. Referrals should be directed to Jean Hoyt (LSCSW, RPT), Clinical Services Coordinator, who will determine which therapist is best fit for each client.

Individual treatment plans are developed upon admission and reviewed on a regular basis to determine treatment needs. Typically, individuals participate in therapy on a weekly basis with sessions lasting 45 min on average.

We accept Kansas Medicaid (Amerigroup, Sunflower State Health, United Health Care), Medicare, Blue Cross Blue Shield of KS, most major insurance companies, and private pay arrangements. Please contact us if you have questions regarding your insurance benefits for our service.
About Our Staff

All therapists are licensed at the Master's level. Clinician certified specialties include Play Therapy, Applied Behavior Analyst (ABA), Certified Autism Specialist, and Eye Movement Desensitization Reprocessing (EMDR) therapies. All therapists have experience working with individuals with autism and intellectual/developmental disabilities.
